

Risk Education Support report

2015 to 2017

During the travelling to different parts of the country and meeting many social workers, we have realized that social workers need support in meeting certain personal and family needs. Some times the need is of monetary support for treatment of health issue of a family member or an accident or it could be child's education. Sometimes it is to clear some legal issue. All that they need is modest support at the right time. At times, the lack of this minimum support discourages them and their belief in social-work erodes. Keeping these needs in mind, a corpus fund has been setup at **Manav Jeevan Vikas Samiti-Bijauri Katni M.P.** with the help of **CESCI Support Association**. The funds generated are spent solely on Social Workers' safety, health and child education. In past 2-3 years, we have been successful in delivering timely assistance to 67 fellows. Although it is a humble assistance, it makes a huge impact on their lives.

We are grateful to **CESCI Support Association** for their tremendous amount of trust in us and support in setting up this fund. Our sincere efforts are to assist social workers and their families through this fund. To take this initiative forward and help us in benefitting more people, we welcome organizations and individuals who would like to contribute to this fund. In this booklet, we are sharing stories of people whom we could help through this fund. We hope to receive more aid and encouragement in taking this process forward.
